

NOTICE OF "FREEZING" COLORADO'S LEGAL LAND DESCRIPTION AND STATUS

On September 9, 1998, the Bureau of Land Management (BLM) Colorado State Office (CSO) will place the Legal Land Description (LLD) and Status Databases on inactive status pending conversion to the Automated Land and Mineral Record System (ALMRS) Release 1.

The Colorado LLD is an automated alpha-numeric file/inventory of current survey information collected from the Master Title and Cadastral Survey plats. The LLD consists of: meridian, township, range, section, survey type, survey number, survey number prefix, survey number suffix (aliquot part, lot, tract, metes and bounds, etc.), nominal location, and acreage depicted on official survey plats. The LLD also contains geopolitical data about each parcel of land: County, Congressional District, BLM District, BLM Resource Area, and Surface Management Agency.

The Colorado Status is an alpha-numeric electronic file containing current Federal land and mineral ownership information, withdrawals, and classifications. This file contains title information concerning transfer of any or all rights to or from the United States and any restrictions or segregations of United States' rights.

Although the aforementioned data will be "frozen", it will still be available in the Colorado Information Access Center, however, the data will only be current as of September 9, 1998.

Requests for information pertaining to LLD, Status, or ALMRS contact Adrian Caufield on (303) 239-3941, or Darlene Alcott on (303) 239-3648.
